## Take charge of access to your facility today.
Let us show you how easy it can be.

Whether you are starting fresh or are looking to update an existing key card entry system, our solutions make your access control project a snap. Replacing a legacy system? Much of your existing hardware could be used, which helps you save on the bottom line. If you're controlling one door or one thousand, Information Controls, Inc. (ICI) can provide access control solutions that easily expand as your organization grows.

RELY ON US.

Save yourself the trouble of looking for something new in a few years, we pride ourselves on customer retention by providing long lasting solutions and exceptional customer service.

INTEGRATED SOLUTIONS THAT WORK TOGETHER FOR YOUR SUCCESS.

If you're looking for solutions that work harder, either in the cloud or on-premise, consider pairing our access control with our time and attendance. These options have the unique ability to work together. That means you save your organization money and save your employees time.

Why cloud?

If you're looking for an access solution that gives you freedom from tying your IT to updates and allows you to determine how long you keep the service, a cloud-based option might be right for your organization. When you use this subscription-based option, you are taking advantage of licensed software as a service (SaaS).

One key benefit of choosing a cloud-based solution is that it does not require capital expenditures on hardware, networking, and other support infrastructure.

Why on-premise?

Organizations who prefer to own the software they are using will prefer an on-premise solution. Once you purchase this software it is yours to use as long as you need it. An on-premise software is best for organizations who prefer complete control over their IT infrastructure.

Key benefits of an on-premise system are increased flexibility in customization and data integration with other business systems.

GO ANYWHERE WITH YOUR ACCESS CONTROL.

Make your management of access control a snap! Our software is browser-based, allowing you to securely check in on access through your smart phone, desktop, or tablet.

When you team with ICI for your access control, you receive award–winning service and solutions that can grow as your organization grows.

Our systems are power over ethernet (PoE) capable which can leverage your existing network infrastructure — reducing the need for additional cable runs. The browser-based software is easy to use whether you choose a cloud-based or on-premise solution.

Information Controls, Inc. offers a suite of services that can make business easier. Our time and attendance software integrates with our access control software to eliminate the need for double entry. It seemlessly updates in real time to enable fast action that can change the way you do payroll and building access.

ICI's document imaging division can take care of all your storage needs. Whether you need to store documents or you need them digitized, we can take that next step to help you with your needs.

Our professional services division has an un-paralleled reputation for client satisfaction and retention. From the setup to the ongoing service, they are there to help you with our products.

ICI prides itself on being able to help organizations with a variety of needs. Give us a call to see how we can help you!
