IntelliTouch 70
One Touch Sets Time In Motion

Nothing in business stands still. Not products. Not deadlines. Not profits. And certainly not your workforce.

The IntelliTouch puts information right at employees' fingertips and encourages them to be responsible for their time and attendance record. Miss a punch? The clock asks for a correction the next time they use it. Use the touch screen to type in an explanation. Accountability and communication—it's about time.

More than a timestamp. It's tracking employees in motion.
What sets the IntelliTouch apart is its smart, adaptive behavior. The high definition touch screen and intuitive icons alert employees and supervisors to the action required next.

If you missed a punch… Then enter it.
If you need time off… Then request it.
If you want to know your schedule or vacation balance… Then review it.

Employees have open access to their time and attendance information freeing up Payroll and HR resources for other important activities.

- Enter missing punch
- Transfer workgroup
- Add Callback punch
- Enter tips
- Review punches, hours, schedule, benefits
- Request time off

Assistance with Meal and Break Compliance

Employees taking short breaks or lunches can put your company at risk for compliance violations. The IntelliTouch 70 has real time communication capabilities that make available information on last punch, schedules, and benefit balances across all time clocks at your facility. Punch restrictions are enforced at all clocks and early punches and short breaks or lunches are virtually eliminated.

The IntelliTouch 70 can also function in near real time so that at peak traffic times, like the start or end of shifts, the punches can be bundled and sent efficiently. This means no waiting in line.

Technical Specifications

Capacity	Up to 1,000 Employees
Multi-language Support	English and Spanish are standard; up to 3 other languages can be configured
Collection Methods	PIN entry HID proximity badges Barcode: Codabar, Barcode 3 of 9, Barcode Interleaved 2 of 5 Magnetic stripe: Track I ASCII or Track II BCD
